renal gluconeogenesis (abstr.), 311
Goldblatt hypertension
aftereffect on renin and the juxta-glomerular apparatus (abstr.), 308
Goodpasture's syndrome
antiglomerular basement membrane antibodies (abstr.), 311

Hematomyelia
after hemodialysis (abstr.), 309
Hemodialysis
and changes in blood volume (abstr.), 313
and hematomyelia (abstr.), 309
exposure to fluoride during, 451
hemodialyzer reuse, 446
renal osteodystrophy in (abstr.), 456
Host response
in urinary tract infections, 179
Hydrodynamics
pressure flow on Henle's loop and rubber tubes, 30
Hydrostatic pressure
proximal reabsorption in pentobarbital anesthetized rats, 204
Hypertension
effect of nephrectomy on (abstr.), 311
low renin hypertension, 317
Hypertrophy
in uninephrectomy in dog, 122
response to unilateral nephrectomy, 131
Hypocalcemia
divalent ion metabolism in renal failure, 437

IgE
in immune-mediated glomerulonephritis, 292
Immune mechanisms
diagnosis in immunopathologic renal disease, 389
in nonglomerulonephritic renal disease (abstr.), 310

Immune-mediated renal disease
interstitial nephritis in rats, 187
Immune responsiveness
response to vitamin B_6 deficiency in uremia, 233
Immunofluorescence microscopy
diagnosis of immunopathologic renal disease, 389
Immunoglobulin
IgE in immune-mediated glomerulonephritis 292
Immunology
diagnosis in immunopathologic renal disease, 389
Infection
of the urinary tract, 179
Insulin
metabolism of, in chronic renal failure treated by transplantation, 372
Interstitial nephritis
in rats immunized with basement membrane, 187
Ischemia
viability of ischemic kidneys (abstr.), 311

Kidney ischemia
renin and aldosterone after renal transplantation, 39
Kinetics
of peritoneal dialysis, effect of dialysate volume on, 240

Lactate
tubular transport in rat kidney, 261
Lanthanum
effects of epithelial membranes (abstr.), 313
Leucocytes
DNA synthesis in, after transplantation, 378
Light cells
distal tubular cells, 137
Lithium
reabsorption of, by rat kidney, 196
Loop of Henle
concentrating process in, *in vivo*, 337
cystic changes in fetal kidneys following ureteral ligation, 111
effect of plasma sodium concentration on reabsorption by, 1
pressure/flow in, 30
Lymph
antibiotics in (abstr.), 455

Membranous glomerulonephritis
change from diffuse proliferative to, 57
Microdissection
of cystic changes in fetal kidneys following ureteral ligation, 111
of kidneys and nephrons in rats with chronic renal damage, 147
Microperfusion
to fix nephrons for morphologic identification, 300
Micropuncture
concentrating process in Henle's loop *in vivo*, 337
experimental glomerulonephritis in the rat, 356
influence of nephron GFR on proximal reabsorption in pentobarbital anesthetized rats, 204
kidneys and nephrons in rats with chronic renal damage, 147
morphologic identification of nephrons during, 300
pressure/flow relationships in Henle's loops and rubber tubes, 30
proximal tubular fluid reabsorption (abstr.), 310
proximal tubular lactate transport in rat kidney, 261
uric acid excretion (abstr.), 312

Natriuresis
depression of, and urinary excretion of furosemide by probenecid (abstr.), 309
in chronic unilateral glomerulonephritis, 422
Natriuretic factor
in pathogenesis of edema in glomerulonephritis (abstr.), 309
transport inhibitory activity in plasma of volume-expanded dogs, 12
Nephrectomy
unilateral, affecting glomerular filtration rate, 131
Nephron function
in glomerulonephritis (abstr.), 306
Nephron GFR
influence on proximal reabsorption in pentobarbital anesthetized rats, 204
Nephronophtisis
and tapeto-retinal degeneration (abstr.), 306

Obstructive uropathy
influence of volume expansion on renal function after ureteral obstruction, 402
reabsorption of phosphate after ureteral obstruction in the rat, 326
regeneration of kidney after, in the rat (French), 221
Oliver, Jean Redman
In context, 77
Introduction to festschrift, 75
Osteodystrophy
effect of aluminum hydroxide on (abstr.), 456
Oxalate
metabolism in stone formers, 285

P-aminobenzoic acid
measurement in plasma and urine, 429
P-aminohippuric acid
measurement in plasma and urine, 429
P-aminosalicyclic acid
measurement in plasma and urine, 429
Parathyroidectomy
effect on reabsorption of lithium and phosphate by rat kidney, 196
Parathyroids
role of, in reabsorption of lithium and phosphate by rat kidney, 196
P-dimethylaminobenzaldehyde
measurement in plasma and urine, 429
Pelvis
renal pelvic epithelium in the rat, 214
Peritoneal dialysis
effect of dialysate volume on, 240
Phosphate
reabsorption of, after ureteral obstruction in the rat, 326
reabsorption of, by rat kidney, 196
renal tubular secretion of (abstr.), 309

Phosphorus
effect of aluminum hydroxide on, in renal failure (abstr.), 307
Pressure
flow relationships in Henle's loops and rubber tubes, 30
Primate
glomerular ultrafiltration in, 271
Probenecid
effect on the urinary excretion of furosemide (abstr.), 309
Protein
morphogenesis of the protein droplet, 96
Pyridoxal kinase
vitamin B_6 deficiency in uremia and depression of immune responses, 233

Rapidly progressive glomerulonephritis
morphogenesis of glomerular crescents in, 47
Reabsorption
influence of nephron GFR on, in pentobarbital anesthetized rats, 204
morphology of the nephron, 96
of lithium and phosphate by rat kidney, 196
of phosphate after ureteral obstruction in the rat, 326
of proximal tubular fluid (abstr.), 310
of sodium by diluting segment, 1
proximal tubular lactate transport in rat kidney, 261
proximal tubular sodium chloride transport, 253
tubular reabsorptive rate of glucose and GFR, 23
Regeneration
of renin after obstruction of the ureter in the rat (French), 221
Renal blood flow
influence of furosemide on (abstr.), 455
Renal failure
effect of aluminum hydroxide on phosphorus, calcium and aluminum metabolism in (abstr.), 307
Renal scarring
vesico-ureteric reflux and (abstr.), 308
Renal transplantation
effect on renin and aldosterone, 39
Renin
after renal transplantation, 39
changes in enzymic activity of (abstr.), 307
in hypertension, 317
in post-Goldblatt hypertension (abstr.), 308

Scanning electron microscopy
for studying the apical pole of distal tubular cells, 137
Shock
pathogenesis of anuria, 106
Sodium
effect of concentrating on diluting segment reabsorption, 1
role of angiotensin in cardiovascular and renal response to restriction of, 348
transport inhibitory activity of, in plasma volume-expanded dogs, 12
Sodium chloride
role of bicarbonate in proximal tubular transport of, 253
Sulfonamides
measurement in plasma and urine, 429
therapy preceding renal failure (abstr.), 309
Tapeto-retinal degeneration
and nephronophtisis (abstr.), 306
Tetracycline
doxycycline pharmacokinetics in the absence of renal function, 365
effect on antidiuretic hormone *in vitro*, 279
Transitional epithelium
renal pelvic epithelium in the rat, 214
Transplantation
aging kidney and (abstr.), 307
DNA synthesis in leucocytes following, 378
effect on ^{125}I-insulin metabolism, 372
effect on renin and aldosterone, 39
malignant tumors in recipients (abstr.), 313
Transport
of lactate in proximal tubules in rat kidney, 261
of sodium chloride in proximal tubules, 253

Urea
concentrating process in Henle's loop *in vivo*, 337
renal pelvic epithelium in the rat, 214
Uremia
doxycycline pharmacokinetics in, 365
effects of nephrectomy in (abstr.), 311
furosemide plasma concentrations in (abstr.), 455
^{125}I-insulin metabolism in, 372
Vitamin B_6 deficiency in, 233
Ureter
ligation of, effecting cystic changes in fetal kidneys, 111
regeneration of kidney after obstruction of, in the rat (French), 221
Ureteral ligation
cystic changes in fetal kidneys following, 111
Ureteral obstruction
influence of volume expansion on renal function after, 402
reabsorption of phosphate after, in the rat, 326
Uric acid
exchanges affected by the kidney (abstr.), 312
renal excretion of (abstr.), 312
uricosuric action of benzbromarone (abstr.), 310
Urinary tract infection
host response in, 179
Urolithiasis
oxalate metabolism in stone formers, 285

Vesico-ureteric reflux
and renal scarring (abstr.), 308
Vitamin B_6
deficiency in uremia and depression of immune responses, 233
Volume expansion
influence of volume expansion on ureteral obstruction, 402

Contents for Volume 5

January—June, 1974

Number 1, January 1974

Effect of plasma sodium concentration on diluting segment sodium reabsorption. *Sampanta Boonjarern, Jay H. Stein, Richard Baehler, Richard W. Osgood, Willa Hsueh, Stanley Cohen, David Yashon and Thomas F. Ferris* 1

Natriuretic and sodium transport inhibitory activity in plasma of volume-expanded dogs. *Vardaman M. Buckalew, Jr. and David B. Nelson* 12

Relationship between glomerular filtration rate and maximum tubular reabsorptive rate of glucose. *Tung-Fan Kwong and Cleaves M. Bennett* 23

Pressure-flow relationships in Henle's loops and long collapsible rubber tubes. *Yong G. Koh and Andrew D. Baines* 30

Plasma renin and aldosterone after renal transplantation. *Rainer Beckerhoff, Georg Uhlschmid, Wilhelm Vetter, Helmut Armbruster and Walter Siegenthaler* 39

The morphogenesis of glomerular crescents in rapidly progressive glomerulonephritis. *K. W. Min, F. Györkey, P. Györkey, Jackson J. Yium and Garabed Eknoyan* 47

Change from diffuse proliferative to membranous glomerulonephritis. *Gabriel Richet, Jean-Paul Fillastre, Liliane Morel-Maroger and Jean Bariety*. . 57

Announcements 72

Number 2, February 1974

Festschrift for Jean Redman Oliver. Introduction *Carl W. Gottschalk* 75

Jean Redman Oliver: In context. *Stanley E. Bradley* 77

The dynamic morphology of the nephron: Morphogenesis of the protein droplet. *Norman Kretchmer and Jay Bernstein* 96

The pathogenesis of anuria following shock. *F. C. Reubi* 106

Cystic changes in fetal kidneys following ureteral ligation. Studies by microdissection. *George H. Fetterman, Mark M. Ravitch and Frank Sherman*. 111

Effect of uninephrectomy on glomerulotubular functional-structural balance in the dog. *Stanley E. Bradley, Kuang-Chung H. Chien, Jaime B. Coelho and Richard C. Mason* 122

Early responses of glomerular filtration rate to unilateral nephrectomy. *Donald E. Potter, Ernest P. Leumann, Tadasu Sakai and Malcolm A. Holliday* 131

Scanning of the apical pole of distal tubular cells under differing acid-base conditions. *Jacqueline Hagège, Manfred Gabe and Gabriel Richet* 137

A study by microdissection and micropuncture of the function of the kidneys and the nephrons of rats with chronic renal damage. *Ronald A. Kramp, Muriel MacDowell, Carl W. Gottschalk and Jean R. Oliver* 147

Announcements 177

Number 3, March 1974

Host response in urinary tract infections. *Thomas E. Miller and J. Derek K. North* 179

Interstitial nephritis in rats immunized with heterologous tubular basement membrane. *David H. Lehman, Curtis B. Wilson and Frank J. Dixon* . . 187

Reabsorption of lithium and phosphate by the rat kidney: Role of the parathyroids. *Thomas H. Steele and Kathryn L. Dudgeon* 196

Influence of nephron GFR on proximal reabsorption in pentobarbital anesthetized rats. *Kenneth Steven* 204

Ultrastructure of the renal pelvic epithelium of the rat. *Fredric J. Silverblatt* 214

Régénération du rein après levée d'une occlusion de l'uretère chez le rat. *Marianne E. Huguenin, Gilbert T. Thiel, Felix P. Brunner, Joachim Torhorst, Edward W. Fluckiger et Heinrich Wirz* 221

Vitamin B_6 deficiency in uremia and its implication for the depression of immune responses. *Hendrik Dobbelstein, Wilhelm F. Korner, Wolfgang Mempel, Hans Grosse-Wilde and Heinz H. Edel* 233

Effect of dialysate volume on peritoneal dialysis kinetics. *Zvi H. Goldschmidt, Harry H. Pote, Murray A. Katz and Leroy Shear* 240

Announcements 246

Number 4, April 1974

Glomerular lesions in dysproteinemias. *Liliane Morel-Maroger and Pierre Verroust* 249

The role of bicarbonate in proximal tubular sodium chloride transport. *David L. Maude* 253

Proximal tubular lactate transport in rat kidney: A micropuncture study. *Bernhard Höhmann, Peter P. Frohnert, Rolf Kinne and Karl Baumann* 261
Dynamics of glomerular ultrafiltration: VI. Studies in the primate. *David A. Maddox, William M. Deen and Barry M. Brenner* 271
Effects of demethychlortetracycline on cellular action of antidiuretic hormone *in vitro*. *Thomas P. Dousa and David M. Wilson* 279
Patterns of oxalate metabolism in recurrent oxalate stone formers. *B. Pinto, G. Crespi, F. Solé-Balcells and P. Barceló* 285
Participation of immunoglobulin E (IgE) in immune-mediated glomerulonephritis. *John J. McPhaul, Jr., Richard W. Newcomb, James D. Mullins, Alfred L. Thompson, Jr., Robert E. Lordon and Phillip W. Rogers* 292
Morphologic identification of microperfused-fixed single nephrons during renal micropuncture. *Giorgio Olivetti, Antonio Dal Canton and Vittorio E. Andreucci* 300
A comparison of methods for measuring urinary ammonium. *Julia Cunarro and Michael W. Weiner* 303
Abstracts, Société Française de Néphrologie, November 3, 1973 306
The Renal Association, October 25, 1973 . . . 306
Swiss Society of Nephrology, December 1, 1973 308
Announcements 314

Number 5, May 1974

Low renin hypertension. *Michael J. Dunn and Richard L. Tannen* 317
Tubular reabsorption of phosphate after release of complete ureteral obstruction in the rat. *Mabel L. Purkerson, Doris B. Rolf, Lewis R. Chase, Eduardo Slatopolsky and Saulo Klahr* 326
An *in vivo* study of the concentrating process in the descending limb of Henle's loop. *J. Phillip Pennell, Frank B. Lacy and Rex L. Jamison* 337
The role of angiotensin in the cardiovascular and renal response to salt restriction. *Albert Mimran, Linda Guiod and Norman K. Hollenberg* 348
Experimental glomerulonephritis in the rat: Structural and functional observations. *Herbert Lubowitz, Debesh C. Mazumdar, Juichi Kawamura, John T. Crosson, Fred Weisser, Doris Rolf and Neal S. Bricker* 356
Doxycycline pharmacokinetics in the absence of renal function. *Andrew Whelton, M. Schach von Wittenau, Thomas M. Twomey, W. Gordon Walker and Joseph R. Bianchine* 365
^{125}I-insulin metabolism in chronic renal failure treated by renal transplantation. *Michel Fuss, Agnès Bergans, Henri Brauman, Charles Toussaint, Pierre Vereerstraeten, Marcel Franckson and Jacques Corvilain* 372
DNA synthesis in peripheral blood leucocytes following renal transplantation. *Alfred L. Jones and Peter R. Uldall* 378
Announcements 386

Number 6, June 1974

Diagnosis of immunopathologic renal disease. *Curtis B. Wilson and Frank J. Dixon* 389
The influence of volume expansion on renal function after relief of chronic unilateral ureteral obstruction. *Douglas R. Wilson* 402
The pathogenesis of drug-induced renal cystic disease. *Frank A. Carone, Randall G. Rowland, Susan G. Perlman and Charles E. Ganote* 411
Functional characterization of chronic unilateral glomerulonephritis in the dog. *Jon P. Wagnild, Frank D. Gutmann and Richard E. Rieselbach* 422
Simplified measurement of *p*-aminohippurate and other arylamines in plasma and urine. *William H. Waugh and Paula T. Beall* 429
Divalent ion metabolism in patients with acute renal failure: Studies on the mechanism of hypocalcemia. *Shaul G. Massry, Allen I. Arieff, Jack W. Coburn, Genaro Palmieri and Charles R. Kleeman* . . . 437
Hemodialyzer reuse: Estimation of area loss from clearance data. *Peter C. Farrell, Joseph W. Eschbach, Joseph E. Vizzo and Albert L. Babb* . . . 446
Exposure to excessive fluoride during hemodialysis. *William J. Johnson and Donald R. Taves* 451
Abstracts, Société Française de Néphrologie, February 9, 1974 455
